Certificate of Composition

acceloHUMICS

Organo-mineral potassium fertilizer (0-0-12)

Item	Measuring results
Humic acids as Potassium Humate	80-85%
Potassium (K ₂ O)	12-14%
Sodium (Na)	1%
Chloride (Cl)	0.2%
Content of water (105°C)	15%
Nitrogen (N)	0,8-1,0%
pH value (in 10% solution)	9-10
Solubility in water	>99%
Density	0.55-0.65 kg/L
Appearance	black powder
Odour	odourless

Properties: „acceloHUMICS“ contains the potassium salts of humic acids and is obtained by alkali extraction of natural, highly oxidized lignite with high content of humic acids and a following drying process. The product is characterized by its excellent water solubility. acceloHUMICS is toxicologically unobjectionable and environmentally compatible. The alkaline pH-value demands however protection for the eyes and skin (protective goggles and gloves).

Storage: In cool and dry place. Shelf life: 5 years from production.

K+S minerals and Agriculture certifies that the statements included in this certificate of analysis are valid.
